

Get Started with MetroCount

Software installation

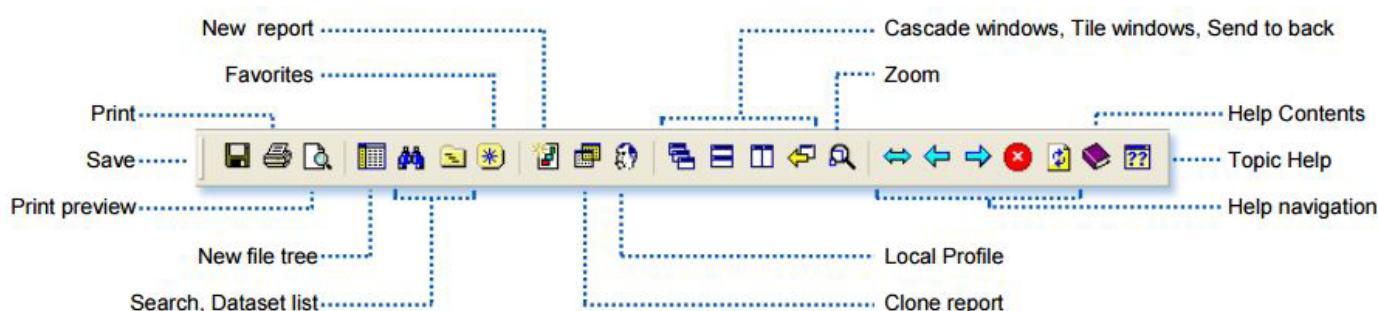

At the time of purchase, an email including a link to the latest software version has been sent to you. Locate that email and follow the steps to log into "MTE Update". Retrieve your product key and

download the software.

NOTE: If you purchased any MetroCount system but cannot find this email, please contact us.

Become acquainted with the MTE® toolbar

Demonstration datasets

During installation, three demonstration datasets are copied to your computer. To locate them, please click Favorites in MTE.

You may freely operate MTE to produce sample traffic reports using these datasets.

Producing your first report

1. Click the *New Report* button to display the File Management List.
2. Select UrbanHwy.ec0 from the Recent Files drop-down, then click *Next*.
3. From the Report Vortex, choose any report, then click *Next*.
4. Confirm your Vehicle and Report Settings (default settings will suffice), then click *Next*.
