

MetroCount[®]

RoadPod[®] VM-V

**Ultra fast, easy & safer data
collection for FHWA funding**

Why just 48 hours of traffic data? Collect 365 days!

DISCREET YET POWERFUL A tiny sensor houses innovative magnetometer technology that records vehicle volumes 365/24/7 with extreme accuracy.

INSTALLED IN 60 SECONDS Designed for super fast installation, the system can be implemented safely across vast road networks with minimal traffic management.

ACCURATE Independently tested to record 100% of vehicle volumes when compared with dual piezoelectric and dual loop data at the same location.

100% OFF-GRID Operating on solar energy and a back up battery, the system monitors traffic year-round with little-to-no maintenance required.

MASSIVE MEMORY Securely stores 365 days of volume data in 5, 15 or 60 minute bins. Download data wirelessly by simply driving past the RoadPod VM-V.
